

Performance

Performance delivers fully customisable acoustic design pieces, tailored to meet the specific needs of any project. Our in-house team oversees the entire creative process, from concept to completion, offering the freedom to develop bespoke solutions that perfectly align with your vision and requirements.

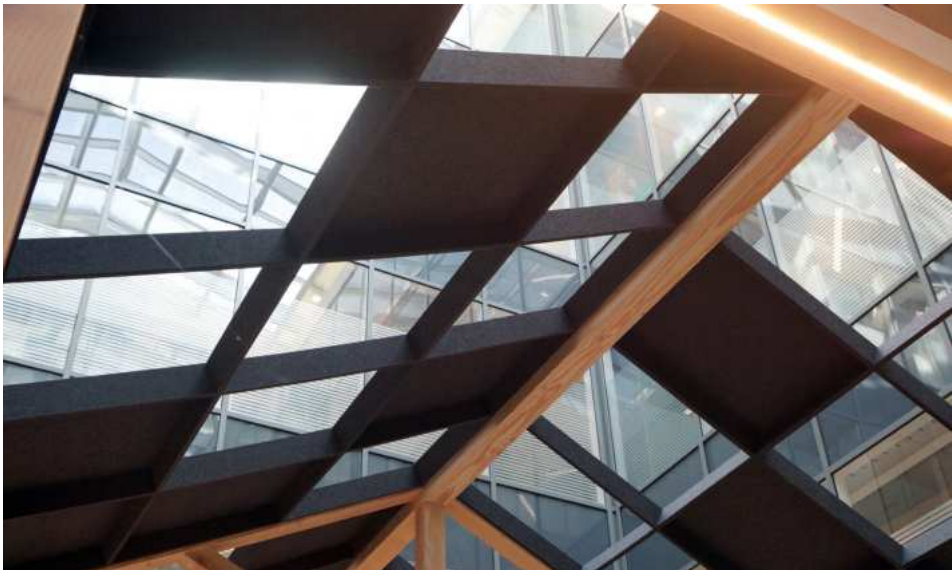

Performance Projects

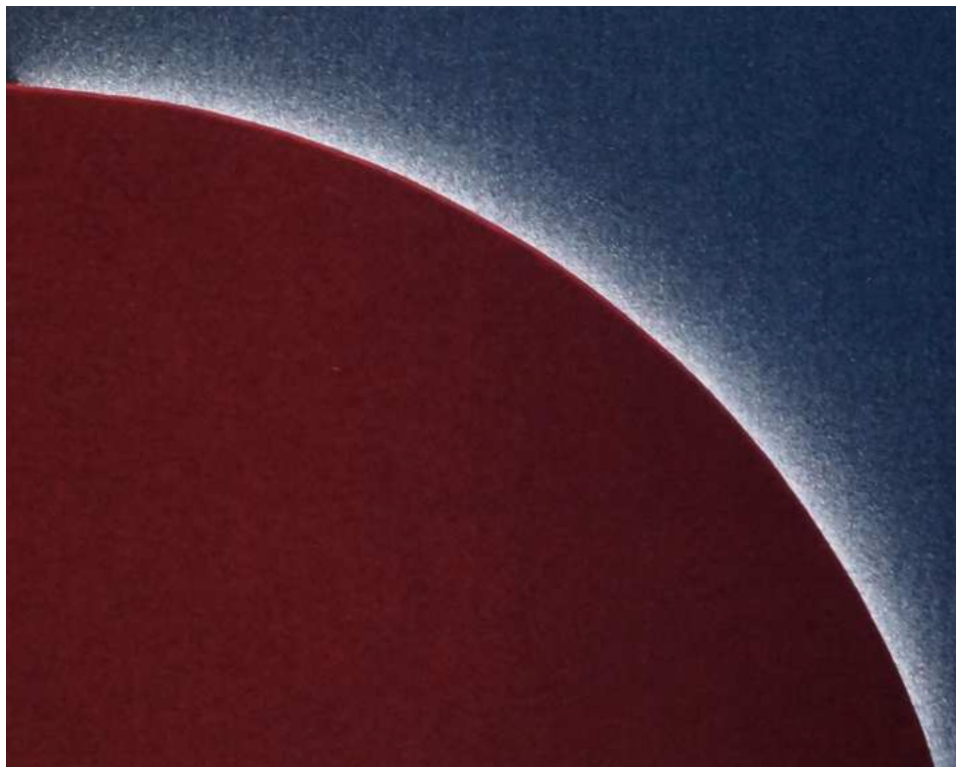

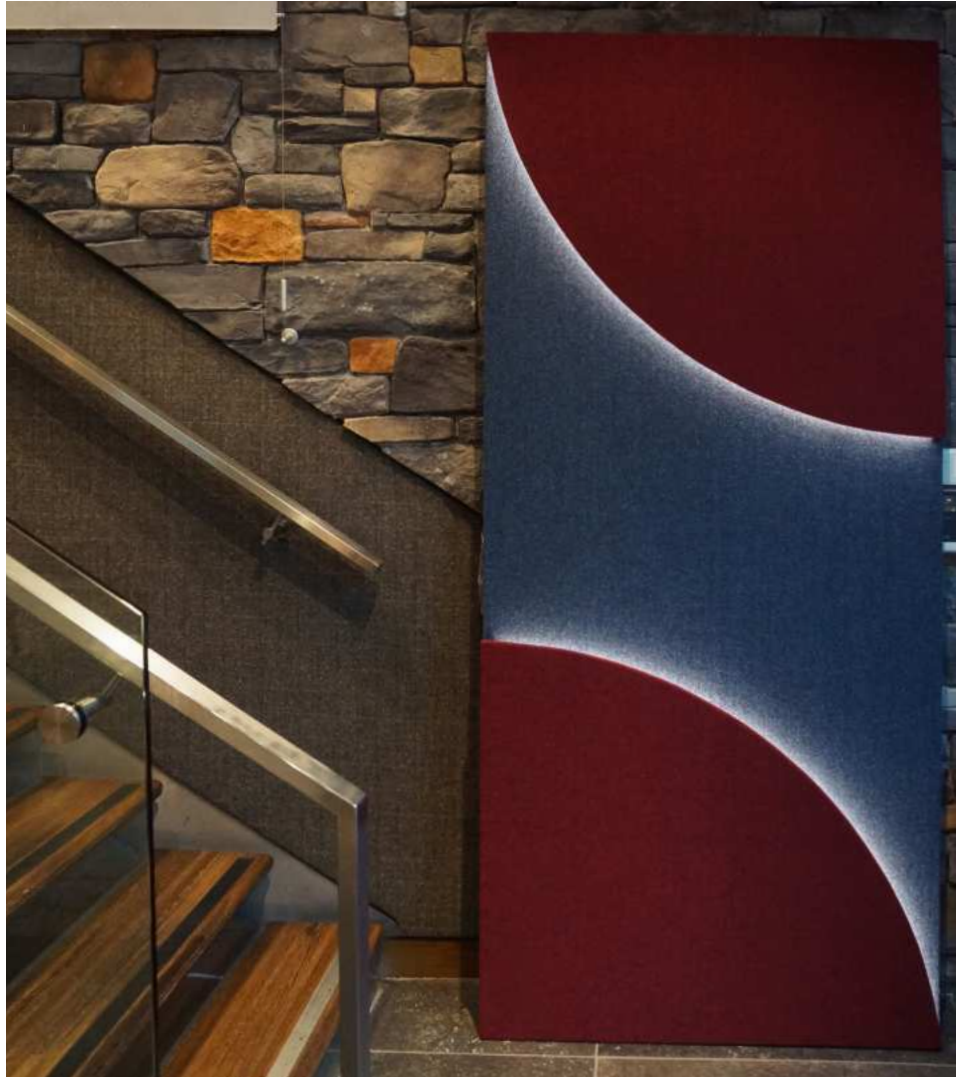

Project: National Lottery

Project: Vibe x Magee

Wrapped fabric panel with LED lights incorporated.

Project: Vibe x Magee

The traditional, unique and patented Donegal fleck Magee fabric was stitched to create custom geometrical shapes. Shapes that are soft to touch, visually interesting and engaging whilst creating an acoustic barrier. The choice of 25mm or 50mm acoustics absorbing material on the panels can be placed directly on walls or mobile walls.
